# Welcome to the BUILD 2018 Architecture Awards

Now celebrating its fourth year, the prestigious Architecture Awards return in 2018 to recognise and acknowledge the outstanding works conducted by imaginative designers, engineers and visionaries, whose inspiring and memorable designs and structures enhance our horizons.

Focusing on a myriad of disciplines, our awards will strive to recognise and pay tribute to all who fall under the scope of Architecture. As energy efficiency and sustainability have become increasingly vital to modern designs, we will also pay homage to those who continue to design the healthiest and cleanest structures, with an added impetus on creating environmentally safe and friendly buildings.

## Best Sustainable Residential Architecture Studio 2018 – Germany & Best Eco-Friendly Residential Project: Stern des Suedens

fabi Architekten is a boutique practice based in Regensburg, Germany, and specialising in creating unique residential projects. We profile the firm to learn more about the work it undertakes and the techniques it employs to bring every project to a successful outcome.

D

rawing on the vast experience of its small team of just five staff, fabi works hard to provide a truly exceptional service to its valued clients, who range from private builders to public communities.

Among the firm's recent projects is the monumental renovation of a salt dome from 1650 in the UNESCO World Heritage Site of the old town of Regensburg. It has 3,000 m<sup>2</sup> of space and six storeys. Once complete, the building will become the museum depot for the new Museum of Bavarian History.

The project is undertaken by fabi's committed team, all of whom are experienced and able to drive excellence for their client. Although technology is used in moderation to improve effectiveness and efficiency, the team are keen not to let digitalisation take over the practice, as they believe that this will make their work lose its soul and true beauty.

Currently, in Bavaria, where fabi is based, a property boom is underway. Due to increasing population numbers due to migration and rural exodus many new properties are required. At the same time, construction prices are higher than ever, providing firms such as fabi with a unique space in which to build a bright future for themselves and their valued clients.

Ultimately, fabi's mission is to create creatively sophisticated architecture so that the world and its cities not only function, but are also beautiful and liveable. As part of its drive to achieve this ambitious target, over the coming year the firm is looking to incorporate a new partner so that it can build upon its current success and further enhance its portfolio of successful projects.
